

INAUGURATING THE MURAL

“SMART GRID FOR SUSTAINABLE SOCIETY”

The creation and execution of the mural.....by Team - Office of Architecture & Design

THE MURAL

The MURAL of “Smart Grid for Sustainable Society”, which was designed and executed by the Office of Architecture & Design, Chitkara University, showcased the combined efforts of Chitkara University with Glasgow Canadian University, British Council and Panjab University.

The inauguration of the mural was scheduled for 21 July 2022, at 12 Noon. Inauguration was to be done by The British Deputy High Commissioner, Chandigarh - Caroline Rowett.

The venue was the terrace, first floor Babbage block. This is the place from where we could have access to the mural. The weather was rainy. Actions were to be executed accordingly.

Various cleaning and shifting activities happened behind the scenes Team Administration at work

*Hurray !! ...It was like as if the Gods had heard our prayers...!
The rains stopped for a while.....
But...the floor was wetand had to be cleared.*

The floor was then covered with plastic sheets and then the carpets laid to keep the carpets dry

The mural was at a great height and too wide for the usual curtains. And even if curtains would be prepared; it would be mundane. We had to think of a novel way to inaugurate the mural !!!

We got our grey cells ticking..... a **curtain of balloons** was the solution we arrived at.... this would be released by the guests to inaugurate the mural....

The mural with the "Balloons-curtain" !!

The guests at the venue.....!

The inauguration....

The guests with Hon'ble Pro Chancellor, Team OIA, Team Administration and Team OAD ...pose for the camera.....

The balloons....multicolored....yet hand-in-hand,..... like all of us at Chitkara,.....flying high...very high....!!!
